

Licensing SQL Server 2016: Expert

Overview: This session is aimed at anyone who needs to be an expert in the licensing of SQL Server 2016. It builds on the topics covered in the Introduction course giving extra information on the licensing of the different editions of SQL Server 2016, and then focussing on how SQL Server workloads can be run in a Service Provider's server farm, and the various options available in Azure.

Delivery: Online

Duration: Up to 90 mins

Level: Advanced
