

Licensing Windows Server 2016: Transitioning from earlier Versions

Overview: This session is aimed at anyone who needs to understand how to transition from the processor-based licensing models of Windows Server 2012 R2 and earlier versions to the core-based licensing model of Windows Server 2016. We will consider the licensing changes and the possible price changes and then look at the processes involved in successfully transitioning licence grants at Software Assurance renewal.

Delivery: Online

Duration: Up to 90 mins

Level: Advanced

Agenda

- Changes in Windows Server 2016 licensing
 - Processor-based v core Licensing
