

EA: Enterprise Enrollment and Enterprise Subscription Enrollment

General information for Enterprise Enrollments and Enterprise Subscription Enrollments

Agreement structure

The starting point of every Enterprise Agreement is an MBSA (Microsoft Business and Services Agreement). The MBSA is an umbrella agreement under which an Enterprise Agreement sits. It is an evergreen agreement between an organization and Microsoft, and contains high level terms and conditions. After the MBSA has been signed, the organization can sign multiple agreements under it. The Enterprise Agreement is the foundation for a set of Enterprise Agreement Enrollments.

There are two enrollments available: the Enterprise Enrollment, for desktop products, and the Server and Cloud Enrollment, for server products and Azure. This document focuses specifically on the Enterprise Enrollment and Enterprise Subscription Enrollment.

Affiliates

An affiliate organization is one that:

- Is owned by the Originating Customer, Owns the Originating Customer, Or, is under common ownership with the Originating Customer
- Ownership is defined as more than 50% ownership
- Affiliates must consist of entire legal entities
- Each affiliate must be entirely "in" or entirely "out"

Enterprise Enrollment: device based
